# International Renewable Energy Project Development in English

Master of Science

TH Aschaffenburg  
university of applied sciences

## Development of renewable energy projects at an international level

You think renewable energies are important?  
You want to be part of the energy transition by developing international energy projects? You'd like to learn to develop international energy businesses in collaboration with students from other cultures? If so, this master's degree programme is exactly what you need!

Pursuing studies with a high degree of practical relevance, you will learn to develop renewable energy projects in an international group of students at the interface between technology, management and regulation. This degree gives you excellent career opportunities in your home country or for an international company. One important aspect of the study program is the practically oriented development of renewable energy projects. For this purpose, we maintain partnerships with companies in this field.. So you are welcome to work in close cooperation with companies in Germany, in your home country or anywhere in the world.

### Do you have any questions?
